-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's response dated 02/15/2006 has been received and entered. Claims 1-9 are remain pending in the application. Claims 10-19 stand withdrawn from consideration.

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kubo et al., US Patent No. 6,295,109, in view of Kaneda et al., US Patent No. 6,798,473.

Regarding claims 1 and 4-9, Kubo et al. disclose a transfective liquid crystal display (LCD) device (figures 2 and 23E) comprising:

. a transparent substrate (1) having a common electrode (4) and an alignment layer inherently formed over the common electrode;

. a TFT array substrate (2/51) having a passivation layer (60), a reflection layer (61), a transparent conductive layer (58a) wherein a reflection portion is thicker than a transmissive portion (see figure 23E).

Kubo et al. do not disclose a color filter being formed over the TFT array substrate.

Kaneda et al. do disclose a color filter (4a/4b/4c) can be formed over an TFT array substrate

Art Unit: 2871

(figure 1) such as the reflection portion and the transmissive portion would have the same color density (e.g., same color).

Regarding claims 2 and 3, Kaneda et al. disclose the transparent conductive layer (5b) can be formed between the color filter (4a/4b/4c) and the liquid crystal layer (7).

Therefore, it would have been obvious to one skilled in the art at the time of the invention was made to employ a color over the Kubo et al. device, so as the transparent conductive layer would layout between the color filter and the TFT array substrate as shown by Kaneda et al. in order to obtain a good color display (e.g. color tone) in an LCD device (col. 9, ln 16-20).

Conclusion

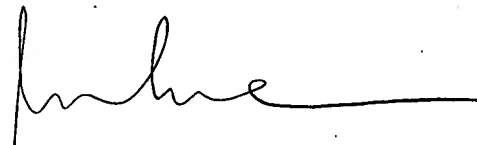

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dung Nguyen whose telephone number is 571-272-2297. The examiner can normally be reached on Tuesday-Friday.
